	ORIGINAL TOTAL			135,000

3. PAYMENTS RECEIVED TO DATE

Month	Amount (KES)
August 2025	35,000
September 2025	5,000
October 2025	15,000
November 2025	15,000
December 2025	15,000
January 2026	5,000
Total Paid	90,000

Outstanding Balance (Original Scope): KES 45,000

4. COMPLETED WORK FROM ORIGINAL SCOPE

✓ Authentication & Onboarding (100% Complete)

- Phone number-based registration with OTP verification
- Multi-factor authentication (PIN + Biometrics)
- Password reset flow with email/SMS options
- Session management with auto-logout (3-minute idle timeout)
- Biometric authentication (fingerprint/face recognition)
- Token refresh mechanism

✓ KYC & Profile Management (100% Complete)

- Individual KYC: ID scanning, selfie capture
- Business KYC: Business name, KRA PIN upload
- Document camera integration for ID capture
- Profile photo upload and management
- Status tracking dashboard

✓ Wallet Management (100% Complete)

- Create unlimited wallets (Personal, Business, Shared)
- Real-time balance display
- Set primary wallet
- Wallet-to-wallet transfers
- Wallet alias search functionality
- Wallet transaction history

✓ Funds Transfer (100% Complete)

- Tuku Send (wallet-to-wallet)
- Bank transfers (multiple banks supported)
- M-Pesa integration (deposits & withdrawals)
- Pay Bill integration
- Till/Buy Goods payments
- STK Push for payments
- Transaction validation with PIN/OTP

✓ Statements & Reports (100% Complete)

- Transaction history with filtering
- Date range selection
- PDF statement generation
- Export functionality

✓ Bulk SMS (100% Complete)

- Send to individual contacts
- Send to contact groups
- Custom sender ID support
- SMS credits management
- SMS top-up via wallet
- Delivery reports
- Outbox with status tracking
- **NEW: Local SMS via device SIM card**

✓ Fundraiser Module (100% Complete)

- Create/manage fundraising campaigns
- Set goals and deadlines
- Accept contributions and pledges
- Progress tracking dashboard
- Checkout link generation
- Pledge payment tracking

✓ Bulk Pay (100% Complete)

- Select from app contacts
- Select from contact groups
- Manual phone entry
- Individual or uniform amounts
- Batch payment processing
- Transaction reports
- **NEW: Device contact integration**

✓ Bills Module (100% Complete)

- Kenya Power (KPLC) payments
- Other utility integrations

✓ POS / STK Push (100% Complete)

- POS configuration
- STK Push payment requests
- Payment status tracking
- Real-time notifications

✓ General Integration & Testing (100% Complete)

- Full API integration
 - Error handling
 - Bug fixes
 - QA testing
-

5. NEW FEATURES IMPLEMENTED (BEYOND ORIGINAL SCOPE)

These features were not part of the initial scope and represent significant additional development work:

5.1 Device Contacts Integration

Description: Fetch and sync contacts directly from the user's phone for use across the application.

Feature	Details
Contacts Management	Full phone contacts sync with permission handling
Contact Data	Name, phone number, search and filtering
Integration	Bulk Pay recipient selection, Bulk SMS recipient selection
User Experience	Progress indicator during sync, selection interface

Estimated Value: KES 8,000

5.2 Local SMS via SIM Card

Description: Send SMS messages directly using the device's SIM card(s), bypassing cloud SMS services for cost savings.

Feature	Details
SIM Detection	Automatically detects available SIM cards on device
SIM Selection	User can choose which SIM card to send from
Direct Sending	Messages sent directly from phone, no SMS credits needed
Integration	Bulk SMS module with "Local Sender ID" option

Estimated Value: KES 10,000

5.3 SasaPay Onboarding Integration (In Progress)

Description: Integration with SasaPay payment platform for expanded payment options and SasaPay wallet creation.

Feature	Status
Individual Onboarding	UI Started
- Confirmation screen (existing KYC details)	Pending
- OTP verification	Pending
- SasaPay wallet creation	Pending
- Wallet activation (KYC submission to SasaPay)	Pending
Business Onboarding	UI Started
- Confirmation screen (existing KYC details)	Pending
- Additional business fields (product type, country, etc.)	Pending

Feature	Status
- OTP verification	Pending
- Additional business documents (CR-12, POA, POB, Director IDs)	Pending
- SasaPay wallet creation	Pending
SasaPay Wallet Management	Pending
- Check SasaPay status before adding wallets	Pending
- SasaPay wallet display and transactions	Pending

Current Status: UI development started, pending full completion followed by API integration, testing, and SasaPay wallet creation.

Estimated Value: KES 12,000

5.4 Complete UI/UX Upgrade

Description: Full redesign and modernization of the entire application interface.

Redesigned Components:

Category	Components Redesigned
Buttons	Primary buttons, secondary buttons, action buttons, sheet buttons
Cards	Wallet cards, transaction cards, contact cards, fundraiser cards, merchant cards
Input Fields	Text fields, amount inputs, phone inputs, PIN inputs, search fields
Bottom Sheets	Wallet selector, top-up methods, send methods, confirmation sheets, SIM selection
Dialogs	Insufficient balance, confirmation dialogs, alert dialogs
Loading States	Loading indicators, shimmer effects, skeleton screens
Navigation	App bars, bottom navigation
Home Widgets	Banners carousel, tools cards, quick actions, wallet display, recent transactions

Category	Components Redesigned
PIN System	PIN dots, numeric keypad, transaction PIN, PIN reset flow

UI Improvements:

- Modern glassmorphism effects
- Consistent color theming
- Custom typography throughout
- Smooth animations and transitions
- Modern iconography
- Responsive layouts
- Gradient backgrounds
- Shimmer loading states
- Improved form validation

Screens Redesigned:

Module	Screens
Home	Main dashboard, wallet display, quick actions, recent transactions
Authentication	Login, Register, OTP, PIN setup/verify/reset
Wallets	Wallet list, wallet details, new wallet, transactions
Transfers	Send money, top-up, bank transfer, M-Pesa
Bulk Pay	Recipient selection, amount entry, preview, history
Bulk SMS	Compose, contacts/groups selection, preview, sender IDs
Fundraiser	Campaign list, create, details, contributions, pledges
Profile	Profile landing, device contacts, settings
POS	Configuration, payment request
Notifications	Notification list, bell indicator

Estimated Value: KES 25,000

5.5 BankGPT Integration

Description: AI-powered banking assistant accessible within the app.

Feature	Details
Authentication	Seamless login with existing credentials
Session Sync	Synchronized with main app session
Navigation	Proper back button handling
Integration	Full-screen assistant interface

Estimated Value: KES 8,000

5.6 Merchant System

Description: Discover, install, and interact with merchant applications (Churches, Businesses, NGOs).

Feature	Details
Merchant Store	Browse available merchants
Install/Uninstall	Add or remove merchants from home screen
Church Features	Tithes, offerings, projects, teachings
Quick Access	Installed merchants appear on home screen

Estimated Value: KES 10,000

5.7 Signatories System

Description: Multi-signature approval system for shared wallet transactions.

Feature	Details
Add Signatories	Invite users to co-manage wallets
Pending Approvals	Review transactions requiring approval
Accept/Reject	Approve or decline signatory invitations
Approval Workflow	Multi-step transaction authorization

Estimated Value: KES 7,000

5.8 Checkout Links System

Description: Generate shareable payment links for fundraisers and collections.

Feature	Details
Link Generation	Create payment links for any wallet
Link Sharing	Share via SMS, WhatsApp, etc.
Payment Tracking	Monitor payments received via links
Integration	Fundraisers, Bulk SMS with payment links

Estimated Value: KES 5,000

6. BUDGET SUMMARY

Original Contract

Description	Amount (KES)
Original Scope	135,000
Payments Received	(90,000)
Outstanding Balance	45,000

Additional Features

Feature	Estimated Value (KES)
Device Contacts Integration	8,000
Local SMS via SIM Card	10,000
SasaPay Onboarding (In Progress)	12,000
Complete UI/UX Upgrade	25,000
BankGPT Integration	8,000
Merchant System	10,000
Signatories System	7,000
Checkout Links System	5,000
Additional Features Total	85,000

Revised Total

Description	Amount (KES)
Original Scope Outstanding	45,000
Additional Features	85,000
Total Outstanding	130,000

7. NOTES

1. All original scope items have been completed and deployed.
2. Additional features were implemented to enhance user experience and meet evolving requirements.
3. The UI/UX upgrade represents a complete visual overhaul of all screens and components.
4. SasaPay onboarding is in progress — UI development started, pending full completion (Individual onboarding, Business onboarding, SasaPay wallet creation) followed by API integration and testing.
